South Carolina Department of Education Annual Accountability Report Fiscal Year 2006-07

The South Carolina Department of Education's annual accountability report for FY 2006-07 presents the performance of the Department and a concurrent review of the state's public education system, which relies on the agency for leadership and support. This accountability report addresses both agency and system: the South Carolina Department of Education in terms of its mission-driven, values-centered strategic focus, and the public education system in terms of data that demonstrate how the state's schools are responding to our leadership.

Section I: Executive Summary

The public school is the greatest discovery made by man.

-Horace Mann

MISSION AND VALUES

The mission of the South Carolina Department of Education (SCDE) is to provide leadership and services to ensure a system of public education through which all students will become educated, responsible, and contributing citizens.

Values are critically important for an agency with the societal responsibilities that the SCDE bears. Our strategic planning process has led us to seven core human values, believing that their embrace by all of our employees will strengthen our ability to fulfill our educational mission:

- **Respect.** Treat all people with dignity and respect in all circumstances.
- Trust. Be trustworthy, believable, credible, and truthful in character and competence.
- **Honesty.** Be truthful in words and deeds.
- **Integrity.** Be consistent and do what is right all the time.
- Responsibility. Willingly accept the obligations and duties for both success and failure.
- Accountability. Be answerable for what was done with what was given and the results achieved.
- Service. Put success and service to students before personal success and self-service.

MAJOR ACHIEVEMENTS FROM THE PAST YEAR

Newly-elected State Superintendent of Education Jim Rex has outlined a vision for comprehensive education reform based on five priorities: accelerating innovation, promoting public school choice, improving accountability, elevating the teaching profession, and providing fair and equitable education funding. Despite the challenges associated with the transition to a new administration, the SCDE made substantial progress in planning for reform in these five areas.

At the same time, evidence from national studies and state tests indicates clearly that education reforms to date have moved our schools in the right direction and that the Education Accountability Act has been an important catalyst for the improvements that have been made.

- Quality Counts 2007, ranked South Carolina first in the nation for the quality of its education standards, assessment, and accountability system, up from third last year.
- National organizations continued to single out South Carolina as one of only a handful of states
 that set high standards for academic proficiency. The respected research journal *Education Next*named South Carolina as one of only three states to earn a grade of "A" for its proficiency
 standards. A long-awaited U.S. Department of Education study listed South Carolina as one of
 only a few states where proficiency standards on state assessments are comparable to national
 standards.
- South Carolina students were national leaders for improvement on NAEP math testing between 2000 and 2005, according to an independent study by the Education Trust. South Carolina's eighth-graders had the best math gains in the nation, and fourth-graders tied for the second-best gains.
- South Carolina students continued to show improvement on the Palmetto Achievement Challenge
 Tests (PACT) in mathematics, English language arts, science, and social studies, and the state's
 high school seniors improved their scores on the ACT college entrance exam for the fourth
 consecutive year even as the number of test-takers continued to grow.

• South Carolina seniors dramatically improved their performance on the College Board's Advanced Placement tests. An all-time high of 14,922 students scored high enough to earn college credit, an 11 percent increase over 2006. The number of African-American students whose scores qualified for college credit increased by nearly 15 percent.

KEY STRATEGIC GOALS FOR THE PRESENT AND FUTURE YEARS

Vision: Our shared vision is for a system of public education through which all students will become educated, responsible, and contributing citizens.

Strategic aims and goals: These goals were developed under the previous administration and will be reviewed and revised during the upcoming year.

1. High Student Achievement

- 1.1. Students are held to rigorous and relevant academic standards.
- 1.2. Students demonstrate essential knowledge and skills as described in the curriculum standards.
- 1.3. Students graduate from high school ready for college or a career.
- 1.4. Students use technology to reach higher levels of learning.
- 1.5. The state educational system components are accountable and aligned so that all students reach a high level of academic achievement.

2. Educator Quality

- 2.1. Educator recruitment and retention programs are successful.
- 2.2. Educator preparation programs produce competent teachers.
- 2.3. Educators are highly qualified, competent, ethical, and caring.
- 2.4. Educator professional development programs are effective.

3. Early Childhood Education

- 3.1. Children enter the first grade ready to learn and succeed.
- 3.2. Children have access to quality early childhood programs.
- 3.3. Children and their families have access to quality family literacy programs.

4. Parental and Community Partnerships

- 4.1. Parents are active partners in their child's learning.
- 4.2. Communities are active partners in student learning.
- 4.3. Businesses are active partners in student learning.

5. Safe and Healthy Schools

- 5.1. Schools are safe, healthy places with environments that are conducive to learning.
- 5.2. School facilities are safe, functional, and adequate.
- 5.3. The public school transportation system is safe and efficient.
- 5.4. Schools form community and state alliances that promote the health, safety, and well-being of students.

6. Education Leadership

- 6.1. School leaders are highly qualified, caring, and supportive.
- 6.2. State education leadership is aligned.
- 6.3. Education leadership is accountable.
- 6.4. Professional development programs support education leaders.

OPPORTUNITIES AND BARRIERS

Opportunities

- Strong leadership for reform in the areas of accountability, public school choice, fair funding, teacher quality, and innovation have created an enthusiasm for change among educators and the general public, providing the opportunity for South Carolina to address many long-standing challenges.
- The Palmetto Priority Schools Initiative, an intensive collaborative effort marshalling the resources of the SCDE, state universities, and other education leaders, offers the potential to improve student achievement in 16 low-performing schools.
- Based on the recommendations of the High School Redesign Commission and the requirement of the Education and Economic Development Act, South Carolina has made strong progress in redesigning high schools to improve graduation and college attendance rates.
- The General Assembly's much-needed commitment to an annual school bus replacement cycle holds the long-term promise of a more efficient and cost-effective transportation system.
- For the third consecutive year, the General Assembly fully funded the base student cost, providing a stable financial foundation for school districts.

Barriers

- With the continuation of a second year of the 4K pilot program (CDEPP), many at-risk children
 living outside the trial and plaintiff school districts will continue to have little or no access to 4K
 programs. Lack of services to these underserved at-risk children throughout the state will inhibit
 our ability to insure all children are prepared to meet the grade level standards required in the
 Education Accountability Act and No Child Left Behind.
- Legislation replacing locally generated property taxes with an additional state sales tax may reduce the ability of local school districts to fund innovative programs and pose additional challenges for high-growth districts.
- South Carolina's schools continue to face a shortage of teachers in critical subject areas and will soon confront a shortage of qualified school administrators. This problem is particularly acute in low-income areas and results in a reliance on foreign teachers who have three-year visas.
- Salaries of bus drivers and maintenance personnel are not competitive with the private sector. Modernization of bus maintenance facilities and equipment continue to present challenges.
- Poverty remains a pressing problem in many areas of South Carolina and continues its deleterious effect on student achievement.

HOW THE ACCOUNTABILITY REPORT IS USED TO IMPROVE ORGANIZATIONAL PERFORMANCE

We use the accountability report for multiple purposes. First, the report is an effective tool for managing the organization. Second, the report serves as an after-action review for the most recently completed fiscal year. The Baldrige criteria serve as the framework for the analysis of current action plans, for the modification of existing strategies and action plans, the development of new strategies and action plans, and the assessment of strategic results. Finally, the report is used to identify opportunities for improvement.

Section II: Organizational Profile

ORGANIZATION'S MAIN PRODUCTS AND SERVICES AND THE PRIMARY METHODS BY WHICH THESE ARE DELIVERED

The system's end product is an educated, responsible, and contributing citizenry. Our core business is education—bringing students, teachers, and information together to instill knowledge and to encourage the proper application of that knowledge. The SCDE's products are leadership and services delivered to school districts and their staff members who assist in the development of teaching and learning programs.

The SCDE's products and services are both internal and external, however. Services within the agency include human resource services, finance and accounting services, research and statistical reports, policy planning, auditing services, information technology services, legal counsel services, and government relations. Within the public education system, the SCDE provides the following services: curriculum and assessment, district and community, professional development, school quality resources, educator guidance and resources, school leadership, grant support, food services, facility planning, transportation, and technology services. The agency's primary delivery methods are based on the needs of its customers. In some cases, state law or other mandates determine the delivery method. Our delivery methods include revising and developing standards, and guidelines; providing resources and materials; providing training and technical assistance; funding programs and initiatives; evaluating programs and staff; developing and administering assessments; collaborating with partners and stakeholders; providing timely and accurate information; responding to customer inquires; promoting and recognizing educational achievements; and monitoring and recommending changes to policies, laws, and regulations.

• KEY CUSTOMER SEGMENTS AND STAKEHOLDERS AND THEIR KEY REQUIREMENTS/EXPECTATIONS

Baldrige Education Criteria for Performance Excellence focuses on students and stakeholders, who are the key beneficiaries of educational programs and offerings. As all businesses must do, education organizations must respond to a variety of requirements and expectations—all of which should be incorporated under customer focus. This approach distinguishes between students and stakeholders for purposes of clarity and emphasis. Stakeholders include parents, employers, schools, and communities. Therefore, the primary and most important customers of the public school system and the SCDE are the students.

The product/service linkage is the state's public school system and the SCDE's leadership and services, which are focused on learning-centered education to ensure student achievement. However, in truth, SCDE customers and stakeholders are diverse and many. They are categorized as internal and external and are identified as part of our strategic planning process. The internal customers/stakeholders include the State Superintendent of Education; the State Board of Education; and the SCDE's administrative, professional, clerical, and trades staff. External customers/stakeholders include educators, administrators, school districts, other professional staff, and support staff in schools; parents, the business community, and the general public; state government personnel and the General Assembly; professional organizations and special interest groups; the news media; and state universities, public colleges, private colleges, and technical colleges. More information on key customers is provided in Section III, Category 3—Customer and Market Focus.

KEY SUPPLIERS AND PARTNERS

Suppliers of the state system and the SCDE are also diverse and many. Parents and families supply students; higher education supplies teachers and training for teachers; bus manufacturers supply buses; textbook publishers supply textbooks and instructional materials; testing companies supply and score assessment instruments. As are our customers, our internal and external suppliers are identified in our strategic planning process. The internal suppliers include the State Superintendent of Education, the State Board of Education, and the SCDE staff. External suppliers include not only those mentioned above but also state government personnel and the General Assembly; teachers, administrators, school districts, and other professional staff; and state universities, public colleges, private colleges, and technical schools.

• OPERATING LOCATIONS

The entire South Carolina public school system consists of more than 90,000 employees located in 1,186 schools within 85 school districts and in related operating units throughout the state. The SCDE's primary operations are conducted in the Rutledge Building in Columbia, in the schools, and in the district offices. School bus maintenance operations are conducted in shops and maintenance facilities strategically located to serve all public schools throughout the state.

NUMBER OF EMPLOYEES

The SCDE has 574 staff members. An additional 402 staff work in 47 school bus maintenance shops or rebuild facilities located throughout the state. The following table provides both a current and a historical summary of full-time equivalency (FTE) authorization for the SCDE:

				,		1	<i>J</i> (,			
YEAR	AGENCY STATE FTE	AGENCY EIA FTE	AGENCY FED/OTHER FTE	AGENCY TOTAL FTE	OTHER ENTITY STATE FTE	OTHER ENTITY FED/OTHER FTE	OTHER ENTITY TOTAL FTE	TOTAL STATE FTE	TOTAL EIA FTE	TOTAL FED/ OTHER FTE	TOTAL FTE

Note: The "Other Entity" designation includes the Governor's School for Science and Mathematics, the Governor's School for the Arts and Humanities, and First Steps.

The following table illustrates employees, segmented by category:

Employee Category	SCDE	Governor's School for the Arts and Humanities	Governor's School for Science and Mathematics	First Steps
Classified	904	39	10	21
Unclassified	2	35	21	0
Temporary grant	40	0	1	10
Temporary classified	135	32	3	3
Temporary unclassified	0	57	3	0

The following table shows FY 2006–07 FTE authorization, excluding "Other Entity" FTE authorization, by bus shop and non-bus shop operating units:

Bus Shop FTEs	Non-Bus Shop FTEs	Total FTEs
454	537	991

The following table shows FY 2006–07 total agency employees, excluding "Other Entity" employees, by transportation system support and non-transportation system support:

Transportation System Support Employees	Non-Transportation System Support Employees	Total Employees
423	523	946

• REGULATORY ENVIRONMENT (<u>i.e.</u>, occupational health and safety regulations, certifications, financial, and service requirements)

The SCDE operates within the state government system and must maintain fiscal, legal, and regulatory accountability. Other state regulations and requirements include the Education Accountability Act, the Appropriations Act, the Education Oversight Committee's Academic Standards, the State Fire Marshall, the Budget & Control Board, State Board of Education regulations as well as the State Auditors Office and the Equal Opportunity/Affirmative Action Employer. The United States Department of Education issues requirements and provides guidance that the SCDE must also follow such as No Child Left Behind (NCLB), IDEA, Title I, III (ESOL), V and VI-REAP. Other Federal requirements are provided by the FCC, OSHA and the USDA. Additionally, the SCDE is accountable to the customers of the education system and, ultimately, to the citizens of South Carolina.

• KEY STRATEGIC CHALLENGES

The regulatory environment under which the SCDE operates is continually changing. The strategic plan aims to meet all state and federal requirements and is updated when necessary to reflect new requirements. However, many districts lack the necessary resources to hire and retain qualified teachers. The school bus fleet is aging, and therefore maintenance costs are high; the need to hire and to retain maintenance staff also presents difficulties. The data collection and analysis requirements of the No Child Left Behind Act are becoming overwhelming.

• PERFORMANCE IMPROVEMENT SYSTEM

Our strategic plan, which contains multiple measures of agency performance, establishes our system for improvements in this regard. The SCDE utilizes both internal and external performance assessments. Key strategic performance evaluations are conducted to determine if the agency is making steady progress toward the accomplishment of its vision. Senior leadership regularly reviews performance data from various sources. Internally, the leadership team uses organizational performance review findings and employee feedback to evaluate the agency's performance. In addition, the EPMS (Employee Performance Management System) and employee surveys serve as effective tools for assessing the individual employee and the organization as a whole.

ORGANIZATIONAL STRUCTURE

The SCDE is led by the State Superintendent of Education, who is a constitutional officer of the state. The State Superintendent also serves as secretary to the State Board of Education. Eight deputy superintendents and thirty-two directors administratively carry out the mission of the

agency. The agency was reorganized in summer 2007 to reflect the priorities of the agency. The chart located in the Appendix graphically displays the organizational structure of the agency.

• EXPENDITURES AND APPROPRIATIONS CHART

The following tables provide expenditures and appropriations for the years listed for the SCDE, the Governor's School for Science and Mathematics, the Governor's School for the Arts and Humanities, and First Steps.

Base Budget Expenditures and Appropriations

(Note: Nonrecurring expenditures are reflected in major budget categories.)

See Major Program Areas Chart located on Page 46.

Section III: Elements of the Malcolm Baldrige Criteria

CATEGORY 1: LEADERSHIP

1.1a How do senior leaders set, deploy, and ensure two-way communication for short and long term direction and organizational priorities?

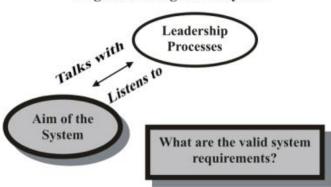

The SCDE senior leadership team consists of the State Superintendent of Education and eight deputy superintendents, who lead the agency's divisions: Administration, Policy and Legislation, Standards and Learning, Accountability, Educational Services, Innovation and Support, Educator Quality and Leadership, and Finance and Operations. The leadership team sets, deploys, and communicates short-and long-term direction and organizational priorities based on the SCDE's strategic plan. The senior leadership team is actively involved in guiding the organization by setting, deploying, and communicating strategic aims, strategic performance goals, and short- and long-term objectives and by monitoring operational action plans. Our middle management leadership team consists of the office directors in the divisions. Directors work with deputy superintendents to effectively communicate, implement, and reinforce the senior leadership's strategic direction and to formulate operational objectives and action plans, policies, and practices to ensure high expectations, clear direction, and accomplishment of objectives. SCDE's strategic goals for education leadership are to ensure that leadership is aligned and accountable. The Aligned Management System provides the SCDE leadership's operating framework.

SCDE senior leadership works with the executive and legislative branches of state government to convey a bipartisan spirit to improve the education system. We actively communicate the needs of our students, schools, and districts to the General Assembly. We work with specific school districts for common alignment of strategic aims and goals. In addition, we continually interact with school district administrators and teachers, providing two-way communications for improvement. Examples include monthly superintendent and instructional leader roundtable meetings. The SCDE's strong relationship with school and district administrators, teachers, parents, public and private businesses, our elected officials, and the general public have contributed to the continuous improvement of the public education system.

1.1b How do senior leaders set, deploy, and ensure two-way communication for performance expectations?

Performance expectations are set, deployed, and communicated as part of the SCDE's strategic planning process. The SCDE's strategic aims, strategic performance goals, and short- and long-term objectives form the basis of performance expectations. These expectations are communicated by the senior leadership team to SCDE staff and stakeholder and customer groups through a variety of methods. The primary method is our published strategic plan, which is available on the SCDE Web site, and constant communication internally and externally. Internally, our middle management leadership team provides continuing focus on performance expectations, assessment against those expectations, and appropriate feedback to SCDE staff. Externally, constant dialogue is maintained through various public forums and frequent meetings such as Dr. Rex's Town Hall Meetings and his statewide Back-to-School Tour.

Aligned Management System

1.1c How do senior leaders set, deploy, and ensure two-way communication for organizational values?

The leadership team is responsible for communicating and modeling our organizational values, which form the basis for standards of ethical behavior. Our values and standards of ethical behavior are consistently articulated both inside and outside the organization. These values provide the underlying foundation for our culture of continuous improvement and high performance. Our personal values include respect, trust, service, integrity, honesty, accountability, and responsibility. Our organizational values include leadership, customer focus, results orientation, responsibility and citizenship, partnership development, management by fact, long-range outlook, designing in quality, fast response, employee participation, continuous improvement, teamwork, open communication, and recognition.

1.1d How do senior leaders set, deploy and ensure two-way communication for empowerment and innovation?

Our employees are empowered and innovation is fostered through the leadership climate. SCDE leadership establishes key goals and objectives and provides guidance. Within this framework, our employees are permitted to determine the methods by which goals and objectives are accomplished. Employees are challenged to seek out innovative methods and solutions to the challenges faced by the education system and the SCDE. Employees are given appropriate freedom to act, and leadership avoids the temptation to micromanage. SCDE leadership accepts the fact that if employee growth and learning are to occur, mistakes will be made.

1.1e How do senior leaders set, deploy and ensure two-way communication for organizational and employee learning?

As mentioned above, organizational and individual learning is promoted for all employees through extensive internal and external learning opportunities. Our Office of School Leadership facilitates internal and external training opportunities for all employees. In addition, all employees are encouraged not only to participate in internal training that enhances personal, organizational, and professional development but also to attend conferences and job-related workshops. For example, all deputy superintendents and directors participated in organizational and personal training with the Center for Creative Leadership that involved team evaluation and 360-degree evaluation by superiors, peers, and subordinates. In addition, all employees were provided a two-day training session on the Baldrige Quality Criteria and the Aligned Management System, conducted by the Andrews Group. In addition, employees are surveyed and asked to identify their training needs.

1.1f How do senior leaders set, deploy, and ensure two-way communication for ethical behavior?

The SCDE promotes ethical behavior by keeping its staff informed of the agency's expectations and standards, conducting briefings on legal and ethical issues, providing EPMS counseling as well as counseling to employees who have breached ethical standards.

1.2 How do senior leaders establish and promote a focus on customers and other stakeholders?

Leadership establishes and promotes a focus on customers through constant contact with key customers/stakeholders. Senior leaders meet with customers/stakeholders on a regular basis to determine progress and needs. The State Superintendent and senior staff meet regularly with district superintendents and the leadership teams from the seven school districts participating in the Baldrige collaborative effort. Promotion of customer focus is inherent in the implementation of our mission to "provide leadership and services." The focus is concentrated on providing service rather than monitoring. An example of customer focus is the fact that the Educator Certification office has a toll-free number (1-877-885-5280) to assist the public as well as a web site where a teacher can access his or her own file 24/7.

1.3 How does the organization address the current and potential impact on the public of its products, programs, services, facilities and operations, including associated risks?

Through a systematic and logical analysis, the SCDE addresses the current and potential impact, including associated risks that its products, programs, services, facilities, and operations have on the public. Senior leadership—as part of the course of action development and the recommendation process—assesses all current and potential strategic actions. Risk assessments are performed as part of this process. For example, the SCDE conducted public hearings before recommending a uniform school start date as directed by the South Carolina General Assembly. In addition, the Office of Internal Auditing performs risk-based audits.

1.4 How do senior leaders maintain fiscal, legal and regulatory accountability?

The SCDE maintains fiscal, legal, and regulatory accountability through various proactive oversight activities. The Offices of General Council, Internal Auditing, and Finance provide strategic-level oversight coupled with operational oversight and monitoring conducted by the responsible offices. Results are reported to the leadership team. The SCDE's provisos are routinely monitored and reviewed to ensure that requirements are followed and reports submitted on a timely basis. The Division of Policy and Legislation ensures compliance with state and federal laws as well as with agency policies and procedures. The Division of Finance and Operations also provides information, analyses, and financial recommendations to ensure efficient and effective use of education resources.

1.5 What key performance measures are regularly reviewed by your senior leaders?

The following are the key strategic performance measures used by the SCDE to determine if we are making progress toward our vision and the accomplishment of our mission:

- student performance and academic progress as measured by multiple tests;
- school readiness data;
- high school graduation rates and statistics regarding postgraduation education and employment;
- enrollment numbers and completion rates of adult education and general education diploma programs;

- teacher quality statistics (test scores, evaluation results, waivers, the number of National Board-certified teachers, accreditation ratings);
- district and school report card results;
- infrastructure measures (school facilities, transportation, textbooks, food service);
- levels and percentages of parent, family, volunteer, community, and business involvement;
- crime report statistics;
- ratings of the education system by professional external organizations;
- leadership measures (Unsatisfactory and Below Average schools and districts);
- customer and stakeholder surveys (educators, special interest groups, parents of students, and the general public); and
- human resource statistics (attrition, average years with agency, employee survey).
- 1.6 How do senior leaders use organizational performance review findings and employee feedback to improve their own leadership effectiveness and the effectiveness of management throughout the organization? How do their personal actions reflect a commitment to organizational values?

The leadership team uses organizational performance review findings and employee feedback to improve its own leadership effectiveness and the effectiveness of management throughout the SCDE. The use of the EPMS and the employee survey has established a two-way communication system between managers and employees within the organization. Job tasks are discussed, clarified, measured, and changed to meet our mission statement. Our senior leaders act on feedback given by SCDE employees during the EPMS review and on the employee survey. In senior staff meetings, feedback is discussed and acted upon as needed to enhance our efficiency and effectiveness. Senior managers in turn give feedback to their employees so that they know the *how* and the *why* of the organization and its mission.

Members of the leadership team are available to all the employees in their respective divisions/offices and to the agency as a whole. The leadership team's personal actions of putting forth extra effort and being honest and fair are essential. The members of the team are not merely leaders by title but have the ability to provide guidance and assistance to others in a mentor/motivator role. Team members work to maintain a positive environment and to empower other agency staff by engaging them in all aspects of the organization. Additionally, the leadership team members share a commitment to an ongoing constant learning about themselves, their staff, the agency, and their individual expertise.

1.7 How do senior leaders promote and personally participate in succession planning and the development of future organizational leaders?

Senior leaders regularly monitor the agency's human resources, determining critical positions and assessing upcoming changes by identifying expected vacancies that may result from retirements and turnover. While the process is not formal, each division works to ensure that employees are retained, educated, and prepared for advancement as positions become vacant. Many positions are first advertised internally.

1.8 How do senior leaders create an environment for performance improvement, accomplishment of strategic objectives, and innovation?

The environment for performance improvements is established by our strategic plan, which contains multiple measures of performance. Performance results are shared agency wide and serve both as motivators and as rewards. Collaboration is a key element of this environment. Innovation is created by the "tone at the top." The State Superintendent and the leadership team provide an atmosphere that encourages creativity, communication, and challenge.

1.9 How does senior leadership actively support and strengthen the communities in which your organization operates? Include how senior leaders and employees contribute to improving these communities.

SCDE leadership and employees recognize their responsibility for good citizenship and community involvement. Our areas of primary interest are education related. For example, we participate in the Lunch Buddies program with Richland School District One, and we strongly support the annual school supply drive sponsored by Cooperative Ministry. Both of these efforts provide support for selected children to enhance their potential for success in school. Internally, the Employee Activity Committee supports a number of worthy activities to enhance internal employee involvement and participation. Our employees are involved in a number of civic, social, charitable, and faith-based organizations that support local communities. Employees voluntarily give their time, effort, and money to a variety of worthwhile organizations that benefit the community as well as the nation: the Red Cross; the National Guard and Army Reserve; the Boy Scouts, Girl Scouts, and Explorer Scouts; and local churches and temples. In addition, they contribute to the United Way and March of Dimes campaigns as well as walks for cancer and diabetes research (i.e., Wellness Walk).

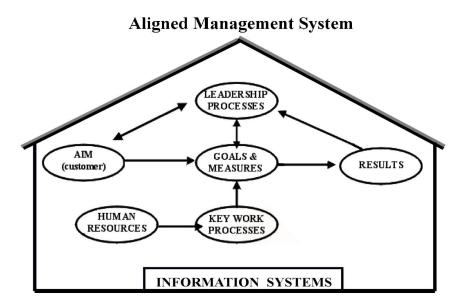

CATEGORY 2: STRATEGIC PLANNING

2.1 What is your Strategic Planning process, including KEY participants and KEY process steps?

NOTE: The strategic plan will be reviewed for possible revision and to align with the initiatives of the current State Superintendent during the upcoming year.

The SCDE commissioned an extensive study of the education climate, culture, and environment of South Carolina and the SCDE. The firm Management, Analysis, and Planning (MAP), of Davis, California, conducted the study that provided our starting point for strategic planning. This nearly two-hundred-page report gave us great insight both into the circumstances producing the current education situation and into customer/stakeholder identification and expectations. It also provided the general direction for our strategic planning efforts.

Armed with information from the MAP study, we adopted as our strategic planning model the Aligned Management System, a Baldrige-type approach to strategic planning and operations. This graphic displays this model:

Such a structure provides for a logical relationship among all elements and affords a framework for strategic planning, the development of strategic goals and measures, the alignment of activities, and the monitoring of results. The desired end is a high-performing SCDE and delivery of value-added services that improve teaching and student learning. The components of the system are as follows:

- A. **Leadership** is responsible at all levels of the SCDE for promoting alignment and core values and sharing with internal and external stakeholders the progress on the aim/goal and the measures/results.
- B. **Aim** is the strategic purpose as determined by the voice of the customers and by leadership's filtering process.
- C. Aim is translated by the SCDE into **goals and measures.** These become the stated deliverables for which the SCDE holds itself accountable.
- D. **Results** are the degree to which the SCDE has been successful in accomplishing its goals and the measure as to whether or not it has produced the stated deliverables.
- E. The SCDE established its **strategic plan** by forging a clear link between the customer and planning at all levels within the agency.
- F. **Key work processes** are the methods, programs, and services the SCDE uses to produce its stated goals (deliverables). Data are regularly collected on processes for guidance or improvement of the processes.
- G. **Human resources** (staff development, recognition programs, and employee well-being) are aligned with processes.
- H. **Information systems** are the data collected throughout the system on benchmarks, results, and all the other components of the system.

The SCDE's strategic plan was last updated in June 2006 and is available on the SCDE's Web site at http://ed.sc.gov/agency/divisions/fhr/documents/StrategicPlanJune2006.doc.

The strategic plan will be reviewed for possible revision and to align with the initiatives of the current State Superintendent during the upcoming year.

2.1a What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address strengths, weaknesses, opportunities, and threats?

Our strategic plan is guided by input from a variety of sources that include the Governor, the General Assembly, the federal government, educators, students, parents, professional organizations, the general public, and other groups internal and external to the SCDE. These constituents, stakeholders, and customers serve as links for identifying, documenting, and articulating concerns regarding the implementation and operation of educational programs and the performance of the SCDE. A continuous line of communication exists between the SCDE and customers for the free flow of needs and expectations.

Our strategic plan's goals and objectives utilize the SCDE's strengths to overcome weaknesses and take advantage of opportunities. While risk is assessed (see 2.1b, below), specific threats are not addressed.

2.1b What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address financial, regulatory, societal and other potential risks?

As part of the strategic process, SCDE leadership assesses environmental factors with regard to barriers, obstacles, threats, and risks. The assessment includes the analysis of financial, societal, and political risks. Financial risks stem from dependence on appropriations and from the volatility of state revenues. Societal risks stem from the reactions of the public to the conduct of the SCDE and the leaders of the education system. Political risks are inherent in the strategic environment of state government and in the actions of elected leaders. For all contemplated strategic actions, a systematic and logical risk assessment is performed to determine both the most probable and the unintended consequences. Once possible sources of risk are identified, selected actions are shaped into a single course of action that will minimize or reduce the financial, regulatory, societal, and political risks.

The use and deployment of the Baldrige criteria allows us to develop budget objectives to support action plans that address the strategic goals and objectives. Funding is provided for activities and action plans that will lead to the achievement of goals and objectives.

2.1c What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address shifts in technology or the regulatory environment?

The SCDE's leadership team, the Office of Internal Technology, and the Office of Career and Technology Education recognize that technology is constantly evolving and that it is essential not only to the achievement of many of our strategic goals but also to the maintenance of our information systems. Our planning process includes assisting local school districts in establishing an effective technology infrastructure and ensuring that all school buildings are linked to educational resources. The SCDE document *The South Carolina State Technology Plan* contains guidelines that can enable educators and districts to translate long-range technology visions for student achievement and technology literacy into compelling, meaningful learning activities. The SCDE strategic plan includes promoting and providing for data-driven decision making with technologies to collect and analyze

student achievement data. The SCDE also aims to increase technological competence in the public schools by establishing competency levels for students as well as educators.

The SCDE recently redesigned its Web site to be more efficient and user-friendly. Its content is more comprehensive and is organized by both topic and audience.

The SCDE's leadership team, the Office of General Counsel, the Office of Policy and Legislation, and the Office of Internal Auditing are responsible for the overall regulatory environment. The agency's eight divisions and the offices within those divisions are responsible for monitoring the regulatory environment of the programs they administer. The SCDE operates many grant programs and must ensure compliance with grantor requirements. The District Auditing and Field Services section of the Office of Finance must remain aware of changes in accounting and auditing standards and must ensure school district compliance with those standards. The Office of Policy and Legislation provides information and assistance to ensure compliance with state and federal laws as well as agency policies and procedures. The leadership team oversees financial accountability systems at the state, district, and school levels.

2.1d What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address for human resource capabilities and needs?

Execution of strategic and operational plans requires various resources. One of the most important is human resources. Potential strategic actions are constrained by available human resources and the capabilities and skills of these resources. Senior and operational leaders assess human resource needs. In addition, open communication exists between leadership and employees for the purpose of allowing employees to express their perceived needs. The SCDE's employee survey provides valuable human resource data that leadership analyzes and acts upon. When shortcomings are identified as part of the strategic planning process, actions are taken to improve human resources, or contemplated plans are modified.

2.1e What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address the opportunities and barriers you described in the Executive Summary (question 4)?

Strategic planning yields the operational concepts or the *how* of executing plans to achieve goals and objectives. Leadership assesses potential strategic and operational courses of action based on current and potential operational capabilities. If current or future capacity and capabilities are insufficient for a desired course of action, steps are taken to increase or improve capabilities, or the course of action is modified to conform to capabilities.

2.1f What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address business continuity in emergencies?

The SCDE has developed a document titled "Fire Prevention, Emergency Action and Homeland Security Plan for the Rutledge Building," which contains a detailed emergency action plan to be activated when necessary by a team of twelve Rutledge Building safety officers. The plan, which was created by the SCDE in conjunction with the Budget and Control Board's General Services Division, addresses security as well as emergency prevention and recovery procedures and was updated March 24, 2006. The agency's technology policy is currently being revised and will involve a complete overhaul of the organization's backup systems and processes. Currently, there is no formal plan

regarding facilities startup and business resumption in the aftermath of a crisis.

2.1g What is your Strategic Planning process, including key participants, <u>key process steps</u>, and how does it address your ability to execute the strategic plan?

Key participants in the execution of the strategic plan include all of those mentioned in 2.1a, above. However, the key participants immediately responsible for the plan's execution in practical terms are all levels of staff members within the SCDE, with key work processes in place in the appropriate divisions and offices so that the SCDE is able to fulfill its stated goals. Data on techniques for guidance or the improvement of systems are regularly collected and reviewed. Communication is a key element in ensuring the success of the strategic plan. Risks are regularly assessed, and action is taken to overcome those risks. We also align our budget objectives to support our action plans and activities. Senior leadership regularly accesses the agency's human resources.

- 2.2 What are your key strategic objectives? (Address in Strategic Planning Chart) DELETED
- 2.3 What are your key action plans/initiatives? (Address in Strategic Planning Chart) DELETED
- 2.2 How do you develop and track action plans that address your key strategic objectives, and how do you allocate resources to ensure the accomplishment of these plans?

Action plans that support strategic goals and objectives are developed at the operational level. The leadership team monitors the development of these plans to ensure adequacy, feasibility, and acceptability. Middle- and senior-level leadership hold monthly meetings to review the status of operational action plans. The State Superintendent meets weekly with the deputies and reviews the progress of operational action plans that address key strategic goals and objectives.

2.3 How do you communicate and deploy your strategic objectives, action plans and related performance measures?

Strategic objectives, action plans, and performance measures are communicated and deployed by the leadership team through meetings and training sessions for all SCDE personnel. All employees have access to the SCDE's strategic plan. Frequent updates on results against performance measures are provided through e-mails and agency reports. Leadership also conducts periodic agency meetings to inform and update all employees on the progress toward achieving strategic goals and objectives and to solicit feedback from employees.

2.4 How do you measure progress on your action plans?

Progress is regularly reviewed by staff members within the office responsible for the action plan and by the senior leadership. The measures of progress used by the SCDE include student performance and academic progress indicators, rates and statistics, external education system ratings, and survey results. See question 1.5, above, for more detailed information on progress measures.

2.5 How do your strategic objectives address the strategic challenges you identified in your Organizational Profile (Section II, Question 8)?

Our plan's goals and objectives utilize the SCDE's strengths to overcome strategic challenges. Our main catalyst for addressing challenges is the goal of ensuring that the state's education leadership is aligned. The work processes undertaken in order for the agency to accomplish this goal involve developing policy, ensuring adequate funding, communicating goals, and reporting achievements. All of these processes help to enable the SCDE to deal effectively with the challenges it faces.

2.6 How do you evaluate and improve your strategic planning process?

The SCDE's strategic plan was last updated in June 2006 and is available on the SCDE's Web site at http://ed.sc.gov/agency/divisions/fhr/documents/StrategicPlanJune2006.doc.

The strategic plan will be reviewed for possible revision and to align with the initiatives of the current State Superintendent during the upcoming year.

CATEGORY 3: CUSTOMER AND MARKET FOCUS

3.1 How do you determine who your customers are and what their key requirements are?

The SCDE's external customers are people or groups of people who receive or use the goods we produce and/or the services we provide or whose success or satisfaction depends on our actions. Stakeholders are people or groups of people with a vested interest in the actions we might be considering. The end customers of both the system and the SCDE are students. It is ultimately their long-term satisfaction with the education provided to them and their educational achievement that will determine our success. The SCDE uses the strategic planning process to identify customers/stakeholders and their key requirements.

3.2 How do you keep your listening and learning methods current with changing customer/business needs and expectations?

Offices within the SCDE perform internal reviews and examinations of their customer services on an ongoing basis. The Office of Finance has a finance steering committee that meets to address school district concerns and gather input. Additionally, the South Carolina Association of School Business Officials meets twice a year to discuss how the SCDE can better serve its customers. The Office of Transportation holds regular meetings with its area supervisors and shop supervisors to address needs and seek input. The District Auditing and Field Services section of the Office of Finance established a committee that consists of CPAs who review the office's publications, such as the *Single Audit Guide*.

The State Superintendent holds monthly meetings throughout the year to receive input from district superintendents and district officials. The discussion-based agenda allows for clearer understanding of how policies are being implemented. The State Superintendent also holds Town Hall Meetings to share his plans for and solicit community input regarding improving, reforming and supporting South Carolina's public education system. In addition, the State Superintendent and the SCDE senior leadership team participate in frequent meetings with customer and stakeholder organizations such as the South Carolina Association of School Administrators, the South Carolina School Boards

Association, the South Carolina Education Association, the Palmetto State Teachers Association, school improvement councils, the deans of college teacher-education programs, local school boards, and parent-teacher organizations.

3.3 How do you use information from customers/stakeholders to keep services or programs relevant and provide for continuous improvement?

Many of the processes used to determine customer needs and expectations rely on the results of surveys. Therefore, the method for improving these processes is continually to evaluate and examine the reliability of the survey instruments and the accuracy of survey results and then to improve the methods of analyzing the results. Personnel in each SCDE office who perform the analysis of their survey results take notes on how the survey could be changed to improve the reliability of feedback received. Key changes in survey results are indicators of changes in customer needs and expectations and help us assess how effective we are at anticipating particular issues or changes in educational trends. All stakeholders are given the opportunity to suggest improvements in services and procedures either through conversations or in writing. SCDE customer focus is driven in part by federal regulations, state statutes, legislative mandates, State Superintendent directives, and the State Board of Education's regulations and guidelines. These governing entities create customer needs for technical assistance. The SCDE uses both formal and informal means to identify the short- and long-term requirements and expectations of its customers.

3.4 How do you measure customer/stakeholder satisfaction and dissatisfaction, and use this information to improve?

We use several measures to determine customer satisfaction with our services. Since these services range widely—from on-site classroom instructional assistance to the purchase and maintenance of school buses, for example—the measurements of customer satisfaction must also span a wide range. Likewise, the improvement and evaluation of the measures are relative to the services provided and the customers served. As a public agency, elected officials, who determine the final priority for funding, measure us each year. Private citizens communicate with these elected officials and the SCDE on how well we are doing our job. The willingness of private businesses to locate in our state is partly determined by the quality of education that will be provided to their employees' children. The economic expansion in South Carolina is a measure of satisfaction with public education. But the most important measure comes through the SCDE's constant interaction with and feedback from school districts throughout the state.

Constant feedback is obtained so that action plans can be updated, appropriate training services can be designed, specific technical assistance can be provided, and new products and procedures can be developed to improve learning and educational opportunities.

3.5 How do you build positive relationships with customers and stakeholders? Indicate any key distinctions between different customer groups.

Customer focus and satisfaction is one of the core values of the Aligned Management System. It serves as the foundation for our continuous improvement efforts and includes all attributes that contribute to improved customer satisfaction. Our customer relationships are developed based on trust, confidence, and loyalty as well as sensitivity to emerging customer requirements and measurements of customer satisfaction factors.

The Division of Educator Quality and Leadership has shortened the certification processing time for over 49,505 instructional staff and 8,127 other staff currently employed in the public schools. The Division has successfully managed the certification process for over 136,000 educators and has assisted thousands more who applied for initial certification or certification renewal. During the past fiscal year alone, the Division fielded over 68,000 phone calls, responded to 69,000 e-mails, assisted 2,780 walk-ins, and worked 45,893* certification cases.

(* Procedures were restructured for cases processed. This figure reflects each case in its totality rather than the number of items processed in each case. This lessens the number of analysts that handle each case and provides for greater efficiency.)

The SCDE has put increased emphasis on customer service by making it the subject of training sessions that have been conducted for all current employees and are required for all new employees.

Educator resources, reporting tools, contact information, and program support need to be available to customers at any time of the day. The agency's Web site (http://ed.sc.gov) is therefore a key tool in the SCDE's effort to build positive relationships and serve customer needs. Averaging 7,000 visits per day (150,000 page views), the site is a portal of news and information, an organizational directory, and the source of more than thirty Web-based applications for data collection and reporting. These applications reduce paper, enhance data quality, and improve timeliness for our schools, districts, and the agency itself.

CATEGORY 4: MEASUREMENT, ANALYSIS, AND KNOWLEDGE MANAGEMENT

4.1 How do you decide which operations, processes and systems to measure for tracking financial and operational performance, including progress relative to strategic objectives and action plans?

Information and analysis requirements are determined by our strategic plan. Operations, processes, and systems that impact learning-centered education to ensure student achievement are measured. All data/information analysis flows from our vision of a system of public education where all students will become educated, responsible, and contributing citizens. For each strategic aim there are multiple strategic goals. Each of these goals has supporting objectives. Both the goals and the objectives have related performance measures. Key operations and processes that have strategic implications for mission accomplishment are selected for measurement. Then, the information that supports the measures and gives indication of progress toward goal and objective achievement is selected for collection. In those cases where information for measuring a specific operation or process is not readily available, a cost-benefit analysis is performed. State, federal, and legislative mandates also determine many of the SCDE operations and processes that are measured. Key customer segments and users of our data also drive the operations and processes that are selected for measurement. For example, the Education Oversight Committee (EOC) and the performance measures established for the school and district report cards have determined data/information selection and analysis. Finally, public interest determines additional processes, operations, and systems that are measured.

4.2 How do you use data/information analysis to provide effective support for decision making throughout your organization?

Management by fact is a key organizational value of the Aligned Management System. We attempt to make all our decisions on the basis of facts. Data/information analysis is used by SCDE leadership to verify, support, or adjust our strategic plan. In addition, we provide this information to the executive and legislative branches of state government to assist in their decision-making processes. Our goal is to assist decision makers in becoming well informed.

An example is the use of data analysis to support decision making centers in report card data and the evaluation of school and district performance. On the basis of this data/information analysis, assistance is provided to Below Average and Unsatisfactory schools and districts. Decisions and recommendations are made involving targeted assistance and the deployment of state education resources such as the placement of teacher specialists. In addition, report card information is used to reward schools for high and/or improving performance.

Another example of the use of data/information analysis to provide support for decision making centers is In\$iteTM data. In\$ite is an expenditure (cost) accounting system that permits analysis of expenditure data/information at the school, district, and state levels. Expenditure analysis is available in a user-friendly display by five major functions, fifteen subfunctions, and thirty-three detail function categories. This tool permits analysis of financial resources and their application.

4.3 What are your key measures, how do you review them, and how do you keep them current with business organizational needs and direction?

A variety of key measures are used to track strategic financial and operational performance. Among the strategic financial measures are current per-pupil expenditures based on In\$iteTM data; expenditures by major budget categories, functions, and objects; and distribution of total expenditures. Strategic operational measures include the following: for technology operations, classroom connectivity and ratio of students to computers; for transportation system operations and safety operations, average age and mileage for school buses, route miles per bus, count of student-transport trips per day, and student transportation accident statistics.

4.4 How do you select and use key comparative data and information to support operational and strategic decision making and innovation?

Comparative data/information analysis is employed in a number of instances. For example, comparative data and information is used to assess our education system's progress against that of the education systems in surrounding states and across the nation. We acknowledge that adjacent states are one group of South Carolina's major competitors for key education and economic resources. Because we compete with other states for teachers, we need to compare and track teacher salaries against national and Southeastern state data. Another example of comparative data/information is student performance based on race, ethnicity, sex, and economic status. This comparative analysis is done to measure the progress toward the objective of reducing the achievement gap among the varied student population segments. We also use comparative data analysis of our own performance over time to identify areas of progress and improvement.

4.5 How do you ensure data integrity, timeliness, accuracy, security, and availability for decision making?

Our data integrity, timeliness, accuracy, security, and availability are enhanced through detailed instructions to providers, consistent definitions, and data collection methods. Checks are performed to verify the accuracy of data elements. Much of the data used for key decision making originates at the individual level (student, employee, customer). For example in the case of student data, the individual student will generate data in the form of test results. These data are then aggregated at the class, school, district, and state levels. At each level, checks for quality, reliability, and completeness are performed. Significant verifications are performed at the district and state levels. In some cases, outside vendors perform reviews. Upon validation at the state level, information is returned to individual districts and schools for verification. For example, the data/information quality, reliability, completeness, and availability requirements for the school and district report cards are spelled out as part of an accountability manual published by the Education Oversight Committee.

4.6 How do you translate organizational performance review findings into priorities for continuous improvement?

A review of performance measures, both formal and informal, is always linked to goals outlined in the strategic plan. The review process is ongoing. The SCDE performs its own reviews; external agencies, organizations, and research groups conduct reviews of the agency as well. Priorities are then established by senior leadership with feedback from the key participants in the process identified as needing improvement.

4.7 How do you collect, transfer, and maintain organizational and employee knowledge (your knowledge assets)? How do you identify and share best practices?

The SCDE manages organizational knowledge to accomplish the collection, transfer, and maintenance of accumulated employee knowledge by integrating the staff development, retention, hiring, and recruiting functions into a holistic and systematic process. Talent management and preparation for possible "brain drain" are primary concerns for the senior leadership team. Projected key staff turnover is monitored, and actions are taken to provide for a smooth transition, the transfer of knowledge, and the sharing of best practices.

CATEGORY 5: HUMAN RESOURCES WORKFORCE FOCUS

5.1 How do you organize and manage work: to enable employees to develop and utilize their full potential, aligned with the organization's objectives, strategies, and action plans; and to promote cooperation, initiative, empowerment, innovation and your desired organizational culture?

Under the leadership of the State Superintendent of Education, the SCDE's work is organized and managed by the eight divisions that serve the agency and are led by deputy superintendents, who are part of senior leadership. Deputy superintendents along with office directors are responsible for the daily operation of their respective offices, which are organized on the principle of work teams. Office work teams are responsible for the development and implementation of the action plans, which are aligned with the strategic plan and which therefore sustain an operational process that promotes cooperation, initiative, empowerment, and innovation. Team members meet regularly to assess

performance, review customer feedback, identify opportunities for improvement, and share information on best practices.

Our leadership team encourages and motivates employees to develop and utilize their full potential through multiple means. Through the EPMS, supervisors communicate job expectations for employees to maximize their knowledge and skills. This formal process also requires a review of each employee's job description to ensure accuracy. Employees are encouraged to participate in staff development activities and to seek additional training to reach the full measure of their ability. Flexible scheduling has allowed employees to attend school while still meeting their job requirements. Employees actively participate on different organizational committees—an experience that exposes them to the variety of the SCDE's activities. Employees continually update their technology skills, expanding not only their own potential but also their worth to the agency.

5.2 How do you evaluate and improve your organization's human resource related process?

The Office of Human Resources has established internal teams to review operational processes on an ongoing basis. These teams review time frames, paperwork flow, and technology for process improvements. Processes related to human resources are evaluated through end-of-class assessments, feedback from exit interviews, and feedback from internal customers.

5.3 How do you identify and address key developmental and training needs, including job skills training, performance excellence training, diversity training, management/leadership development, new employee orientation and safety training? How do you evaluate the effectiveness of this education and training? How do you encourage on the job use of the new knowledge and skills?

Through an employee survey, the SCDE asked its employees to identify their professional training needs. New technology has required training and new performance expectations. The number of promotions and additional job duties granted within the agency demonstrates the variety of development skills that our employees have acquired. Today the SCDE has a well-balanced workforce that represents the population of our state. Our employees have had training in the Malcolm Baldrige model so that the organization as a whole demonstrates continuous improvement in meeting the objectives in our mission statement. Staff development and training are an active part of the agency's day-to-day operations. All new employees participate in or complete a comprehensive orientation program as well as receive a personal letter welcoming them to the agency from Dr. Rex. Safety training for safety-sensitive positions is conducted annually, with specific training being provided throughout the year as needed.

Education and training are assessed through formal end-of-class evaluations, which provide information that is used to improve existing training and to expand training opportunities for staff. In addition, the objective section of the EPMS is used by supervisors and employees to identify methods and opportunities for individual employees to acquire increased job-related skills and knowledge—a special training course or a project for an employee to complete during the rating period, for example.

5.4 How does employee training contribute to the achievement of your action plans?

Through training, SCDE staff is made aware of the agency's priorities and the focus on customer service. They are also provided the information and have complete simulations to strengthen their skills that are used to accomplish the portion of the action plan they are assigned.

5.5 How does your employee performance management system, including feedback to and from employees, support high performance and contribute to the achievement of your action plans?

Components of job duties, objectives, and performance characteristics included in the EPMS are directly aligned with the agency strategic plan and the action plans established by the individual offices. Evaluations of individual employees are centered on criteria that were developed in their EPMS planning stage.

If employees are to attain high levels of performance, they first must understand the expectations of their supervisors and the requirements detailed in their respective position descriptions. The EPMS provides the means for these expectations and requirements to be communicated. In the planning stage, the employee and supervisor first review the employee's position description for accuracy and understanding; at this time, the position description can be updated or modified to ensure these two factors. The employee can now ask for the supervisor's expectations and can express his or her own expectations.

Also during the planning stage, the supervisor or the employee can recommend a performance objective that the employee can accomplish over the course of the rating period. By this means, the employee can demonstrate performance that even exceeds the supervisor's expectations. In addition, the employee and the supervisor can meet to discuss progress at any time throughout the rating period. This process of active communication between supervisor and employee does support high performance.

5.6 How do you motivate your employees to develop and utilize their full potential?

Employees are motivated to develop and utilize their full potential through their EPMS evaluations, which are linked to the agency's strategic plan and to the action plans developed by the individual offices. Supervisors review EPMS assessments with agency employees, who are then encouraged to attend position-specific training sessions and conferences to further develop their skills. The SCDE has an annual recognition ceremony as well as agency activities that are designed to motivate staff.

5.7 What formal and/or informal assessment methods and measures do you use to determine employee well being, satisfaction, and motivation? How do you use other measures such as employee retention and grievances? How do you determine priorities for improvement?

The SCDE utilizes multiple assessment methods and measures to determine employee well-being, satisfaction, and motivation. First, the EPMS requires feedback between management and the employee. Second, the Employee Activity Committee, which is composed of employees from each division, meets monthly to address issues within the agency. Feedback is encouraged at the monthly division and directors meeting between management and employees. Third, the SCDE conducts an agency wide survey to determine employee expectations and perceptions. Survey responses are given serious consideration by leadership, and appropriate actions are taken. Fourth, the Office of Human Resources has an open-door policy whereby any employee with a concern can communicate that concern without reprisal. Human Resources will communicate the concern to the appropriate authority only with the employee's approval. Finally, leadership seeks and encourages feedback from employees at all levels within the organization at all times.

Information from exit interviews and employee grievances is used in supervisory training in the form of case studies and examples. Priorities for improvement are determined by the particular SCDE office or through updated action plans.

5.8 How do you maintain a safe, secure, and healthy work environment?

Our facilities comply with OHSA (Occupational Health and Safety Administration) standards and are reviewed on a regular basis for compliance. Both the air quality and the water quality in the building are tested. In addition, the Budget and Control Board has tested for asbestos. Each floor of the Rutledge Building has a safety officer and two assistant safety officers. Preparation for workplace emergencies and disasters include controlled access to the building and monitoring by security personnel. The building has a fire plan, a bomb threat plan, and a Clean Indoor Air Act policy. Safety training is conducted yearly for safety-sensitive positions. Employees notify either the Office of Human Resources or Administrative Services if they identify any unsafe condition within their work environment. In addition, the SCDE has attempted to make the physical facilities more pleasant by improving the appearance of the landscaping. Student art now dresses the walls of many offices, halls, and conference rooms within the physical facilities.

CATEGORY 6: PROCESS MANAGEMENT

6.1 <u>How do you determine, and</u> what are your key processes that produce, create, or add value for your customers and your organization? How do you ensure that these processes are used?

Processes differ greatly among the various public school systems and SCDE operations. The most important system process in education is the learning process, the success of which is determined by multiple measures of students' academic achievement. The SCDE's processes range from providing leadership and technical assistance to schools and districts to providing public education services such as support for teachers and teacher certification, transportation, school facilities plan and building approval, food service support, human resources, purchasing, and finance. Therefore, factors such as the nature and the type of the products and services, the technology requirements and limitations, customer and supplier relationships and involvement, and product and service customization impact our process utilization.

6.2 How do you incorporate organizational knowledge, new technology, changing customer and mission-related requirements, cost controls, and other efficiency and effectiveness factors such as cycle time into process design and delivery?

The design and delivery of our products and services are based primarily on the requirements of our customers. Due to the nature of our products and services, the cycle time varies for each of them. Through the SCDE's performance of formal needs assessment, changes in customer needs and the impact of technology are incorporated into the design and delivery of our products and services. This procedure is followed for services both internal and external to the SCDE. In some cases, SCDE product and service design, production, and delivery processes are determined by state law or legislative mandates. For example, the SCDE strictly adheres to the state-established procurement code and the state-established human resource process. The updated Web site provides instant access to more agency products and reduces cycle time for certification processing, grant applications, and so forth. Because SCDE employees are knowledgeable about emerging "hot" topics and educational issues, they are able to respond quickly to customer inquiries. Funds are remitted to school districts

both on a monthly schedule and on a reimbursement basis to ensure adequate funding. Other public education services such as food service, curriculum standards, assessment, and professional development are delivered on a regular basis.

6.3 How does your day-to-day operation of these processes ensure meeting key performance requirements?

Our teams, work groups, and individual employees accomplish the day-to-day operation of key production/delivery processes. Therefore, their input is solicited for the creation of new processes and for the improvement of existing processes. Cross-functional teams are also employed to bring the widest range of disciplines into the design of products and services. The leadership team establishes key performance expectations and requirements and then communicates them to the cross-functional teams, work groups, and individual employees. Our goal is to obtain process management at the execution level and to achieve self-monitoring of processes at the work-unit level. To ensure that all processes are operating within upper and lower control levels, leadership performs periodic reviews.

Our day-to-day work with districts, schools, teachers, bus shop personnel, and other specialized local staff provides the agency with immediate and continuous feedback. We constantly seek input from key suppliers, contractors, and partners in order to improve our processes. For example, a major component of the transportation system is the process of purchasing school buses. A subcomponent of this process is the school bus specification process. Through input and feedback from bus suppliers and vendors, it was determined that the current school bus specification process was neither efficient nor effective. As a result of supplier input, a school bus specifications committee was established to bring major stakeholders together. SCDE employees, General Assembly members, and school bus suppliers jointly modified the existing process, thereby improving performance in the process of determining school bus specifications.

6.4 How do you systematically evaluate and improve your key product and service related processes?

To improve organizational performance, the SCDE manages key supplier/contractor/partner interactions based on the unique requirements of each product and/or service. The SCDE's support functions provide the lead in management of key supplier/contractor interactions. Management and support of key supplier/contractor/partner interactions and processes to improve performance are primarily accomplished through maintaining healthy vendor relations. Suppliers and contractors must adhere to all state and federal procurement codes and regulations. SCDE vendors are partners in our endeavors and are key to our success. The SCDE seeks long-term partnerships with suppliers and contractors in order to achieve cost-efficient operations.

6.5 What are your key support processes, and how do you improve and update these processes to achieve better performance?

Multiple key support processes help the SCDE achieve better performance across a wide range of activities. Key support processes within the SCDE include the following:

- human resource services,
- finance and accounting services,
- research and planning services,
- district and internal auditing services,

- information technology services,
- legal counsel services, and
- government relations services.

Key support processes within the public education system include the following

- curriculum and assessment services,
- district and community services,
- professional development and school quality services,
- teacher services (e.g., certification guidance, instructional materials and resources),
- professional development and school leadership services,
- grant support services,
- food services,
- school facility services,
- transportation services, and
- technology services.

6.6 How does your organization determine the resources needed to meet current and projected budget and financial obligations?

Organizational senior leaders, with input from subordinate program managers, identify the explicit and implied current and projected mission requirements related to all obligations. Related resource requirements (financial, human capital, equipment, etc.,) needed to execute the mission and task requirements are also identified. All current and new requirements are compared to available resources and required resources, and adjustments are identified. When required resources and obligations exceed available resources and obligations, a request for additional resources is submitted to the General Assembly. If sufficient/additional resources are not received from the General Assembly to meet required obligations, task requirements are prioritized based on the organization's vision, mission and legislative directives.

CATEGORY 7: RESULTS

7.1 What are your performance levels and trends for the key measures of mission accomplishment and organizational effectiveness?

Students in grades three through eight continue to show improvement on the Palmetto Achievement Challenge Tests (PACT):

^{*}Accommodations were not permitted for this assessment; therefore, caution should be used in the interpretation of results because samples may not be comparable.

NOTE: FY2007 NAEP results are not due to be released until October, 2007. This information will be available through our office of Assessment until it is ultimately included in the FY 2008 Accountability Report.

Prior to March 2005, the SAT contained only two tests: a verbal section and a math section. The SAT was then changed to include a third test: a writing section. In addition, the verbal section was renamed "critical reading." For the purposes of comparison with scores from prior years, only the critical reading and math sections are presented in figures 7.1-6 and 7.1-7, below, as composite scores. The writing score is presented separately in figure 7.1-7a.

School report card results are based on Education Accountability Act standards, criteria, and measures of performance as established by the Education Oversight Committee.

Figure 7.1-11

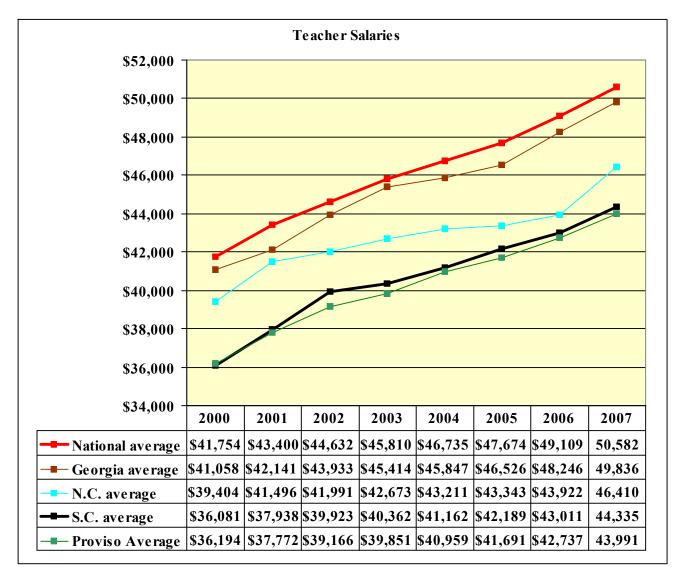

Students use technology to reach higher levels of learning, a fact indicated by increased school and classroom connectivity. The lower its student-to-computer ratio, the better positioned a school is to establish a digital learning environment:

South Carolina's average teacher salary has risen slightly faster than the nation's average teacher salary but still trails the national average by approximately \$6,200 annually:

A measure of teacher quality in a state, the number of teachers earning certification by the National Board for Professional Teaching Standards has increased significantly in South Carolina:

Figure 7.1-15

Figure 7.1-16
Teacher Turnover Rate

	2002	2003	2004	2005	2006	2007
State average	10.4%	10.4%	8.7%	10.3%	10.0%	11.3%
District median	12.5%	10.8%	9.3%	12.4%	13.1%	14.0%
District's range	4.4%-31.2%	3.5%-33.3%	2.0%-29.3%	6.2%-34.2%	7.1%-34.3%	7.4%-33.3%

ADEPT (Assisting, Developing, and Evaluating Professional Teaching) evaluation results indicate that South Carolina teachers meet required standards:

Figure 7.1-17

	2001	2002	2003	2004	2005	2006	2007
Number of teachers evaluated	42,983	45,331	51,608	47,578	50,170	52,230	53,080

Recognizing the need to help schools improve their ability to engage families and their communities, the SCDE developed Red Carpet Schools, a statewide initiative promoting the importance of family-friendly schools and excellent customer service. Red Carpet Schools are inviting places where visitors are welcome and where parents and community members are actively involved in the decision-making process.

Figure 7.2-2
Red Carpet Schools

Applicants and Awards	2004	2005	2006	2007
Number of schools applying	307	277	323	269
Number of schools earning awards	78	54	100	61

NOTE: The Red Carpet Schools program began in 2001. The designation was first awarded to schools in 2002. Schools maintain the status for three years. School year 2005–06 was the first year that schools originally receiving the Red Carpet designation could reapply for it.

7.3 What are your performance levels for the key measures of financial performance, <u>including</u> measures of cost containment, as appropriate?

The In\$iteTM expenditure model reveals that over 72 percent of South Carolina's public education expenditures are for direct classroom instruction and instructional support.
